EDUCATION

- **Master of Science in Information Systems**, Santa Clara University – Leavey School of Business, GPA: 3.7/4.0 **Dec 2025**
Relevant coursework: Data Analytics, SQL, Deep Learning, Software Project Management, Info Systems Analysis & Strategy
Upcoming coursework: Business Intelligence & Data Warehousing, NLP, Gen AI for Enterprise, Product Management
- **Bachelor of Engineering in Computer Science**, National Institute of Engineering, GPA: 3.9/4.0 **Jun 2017**

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Design and Development, *Siemens Healthineers* **Jul 2017 – Sep 2023**

- Led the design and development of 50+ software components and features on in-vitro lab diagnostic instruments. Optimized the proprietary framework used in 4+ products, contributing to \$2.5M in generated revenue.
- Spearheaded the integration of advanced encryption modules for secure processing of Personally Identifiable Information (PII) and Protected Health Information (PHI), adhering to industry data privacy standards.
- Developed role-based access management features in enterprise software, ensuring secure workflows and compliance with regulatory standards for large-scale data processing.
- Implemented a machine learning tool for root cause analysis, reducing issue resolution time from 13+ days to under 5 days.
- Collaborated with cross-functional teams globally to perform requirement analysis and risk assessments; drove alignment through design and code review sessions, resulting in the success of 3 major releases.
- Delivered a Log Analysis Dashboard using PowerBI, automating workflows and reducing manual effort by 42%.
- Conducted user research as part of the UX Center of Excellence team, developing personas and providing insights to improve product usability, increasing user satisfaction by 35%.
- Mentored 3 junior engineers, fostering their professional growth and contributing to promotions of 2 team members.

Summer Research Fellow, *Indian Academy of Sciences* **Jun 2016 and Jan 2017**

- Accomplished the research project 'Iris Recognition System' under Padma Shri Prof. B. L. Deekshatulu. Performed pre-processing of image data by developing a partial iris segmentation technique. Utilized MATLAB and feature engineering.

PROJECT BASED EXPERIENCE

Data Analytics and ML, *Ethical Bias in Machine Learning* | Personal Project **Nov 2024 – Present**

- Implemented data preprocessing and regression models to evaluate demographic biases in prediction, demonstrating improved fairness by leveraging non-demographic features like monetary transactions and social network behavior.

Operations Strategy, Analysis and Design, *StoryLens* | B-School Project **Oct 2024 – Dec 2024**

- Ideated a venture to develop an AI-driven interactive storytelling app that allows users to co-create and experience personalized, educational and/or entertaining stories; Built the project iteration schedule and conducted a cost-benefit analysis.
- Authored use cases and built operational flow chart to visualize the scalable process of generating custom stories.

Data Visualization, *TABLEAU - Customer Analysis* | Personal Project **Sep 2024 – Oct 2024**

- Conducted exploratory data analysis and identified the correlations that may have an impact on spending. Presented the insights using TABLEAU to enable informed business decisions.

Business Planning and Product Management, *TrendZ* | B-School Project **Apr 2024 – Jun 2024**

- Served as Scrum Master for a team of 5, overseeing end-to-end SDLC activities of open-source software integration project.
- Led the development of a revenue model. Authored user stories and prioritized them by employing story-point algorithm.
- Crafted a comprehensive product roadmap with milestones. Performed risk assessment, and documented mitigation plans.
- Won the "Instructor's Choice" Award for exceptional project execution and final pitch presentation.

Data Security, *Enigmatic Video* | Undergrad Capstone Project **Jan 2017 – Jun 2017**

- Implemented a secure video information hiding method leveraging RSA public-key cryptography and an improved LSB algorithm. Presented the technical paper at the International Symposium on Cloud Computing and Data Analytics (ISCCDA17).

LEADERSHIP AND AWARDS

- Awarded "**Top Hack 2**" (among 75+ teams) at the International Siemens Healthcare Hackathon for devising the prototype of a 'Low-Cost Portable Urine Analyzer' using the YOLOv3 deep learning model; the prototype was later productized.
- Inducted to the virtual **Wall-of-Fame** for successfully implementing a complex feature contributing to the Covid antigen test.
- Initiated and organized weekly knowledge-sharing sessions at Siemens Healthcare, fostering a culture of continuous learning.

SKILLSET

- **Programming skills and Methodologies**: Java, Python, C#, SQL, NoSQL, TensorFlow, Keras, Agile, SCRUM, Lean, Kanban.
- **Business and Design skills**: Data-Driven Decision Making, Strategy and Operations, Market Research, Stakeholder Management, Risk Assessment, Change and Release Management, Design Thinking, Iterative Prototyping, User-Centric Development.
- **Tools**: Excel, PowerPoint, JIRA, MS Planner, Git, Azure Devops, MS Project, Miro, Whiteboard.
- **Soft skills**: Teamwork, Ownership, Problem Solving, Analytical Thinking, Storytelling, Adaptability.
